# About us

**Majal Al-Rasd Security Est. is a Saudi company licensed and approved by the Supreme Authority For Industrial Security in the field of security surveillance camera systems.** The company specializes in surveillance systems, security solutions, and low-current systems. We provide site surveys, system design, supply, installation, programming, testing, maintenance, and technical support services for residential and commercial sectors, in accordance with the relevant regulatory and technical requirements in the Kingdom of Saudi Arabia.

# Vision

To be a trusted provider of security systems and low-current solutions through practical, reliable, and client-focused services.

# Mission

To deliver reliable security and technology solutions that protect facilities and enhance operational efficiency.

# Values

## Clarity

Defining the scope of work prior to execution

## Quality

Execution of work in a structured and clear manner

## Commitment

Adherence to schedules and agreements

## Integrity

Recommending the most suitable solution, not just the most expensive

## Development

Keeping up with modern solutions in security systems and networks

## Support

Following up with clients after installation through maintenance and technical support

# Services Overview

We don't just sell devices; **we provide an integrated solution** that starts with understanding the site's needs and ends with a ready-to-operate system that is maintainable and upgradable.

Low Current  
Systems

Video Conferencing**

## Maintenance and Technical Support

Post-installation maintenance and technical support services to ensure system efficiency and continuous operation

- Camera and recording device inspection
- Verify recording integrity and hard disk health
- Check image quality and remote viewing access
- Inspect network and Wi-Fi connectivity
- Check attendance and access control devices
- Update configurations when needed
- Troubleshoot and resolve technical issues
- Provide a brief visit report (if agreed upon)

## Annual Maintenance Contracts

- Scheduled periodic visits
- Priority technical support
- Reduced unexpected failures
- Monitoring recording and storage status
- Maintenance report when needed
- Remote support when possible
- Maintenance and visit log management

# Work Methodology

- Receive the request and understand the site type and required service
- Conduct a site inspection or review drawings and images when available
- Determine the appropriate solution, device types, and number of points
- Prepare a technical and financial proposal outlining scope, timeline, and warranty
- Supply, implementation, wiring, and installation as agreed
- Programming, testing, and configuration adjustments
- Handover and basic user training
- Post-delivery support as per agreement or maintenance contract

# Quality and Compliance

1. Professional execution with attention to installation quality and cable management.
2. Use of equipment suitable for the site requirements.
3. Organized and efficient system cabling.
4. Compliance with safety requirements during installation.
5. System testing before handover.
6. Clear communication of warranty and maintenance terms.
7. Protection of client data confidentiality.
8. Access credentials shared only with authorized parties.
9. Guidance on regulatory requirements when applicable.
10. Documentation of installation points and cabling when agreed.
11. Delivery of essential system information to the client.

# Technical Documentation and Handover

Switch and Rack Labeling

Network Cable Labeling  
and Numbering

Provision of a simplified point  
layout diagram when required

Delivery of System Login  
Credentials

Pre-handover Observation  
Report (if any)

System Testing Report

User Training on Basic  
Operation

# Industries We Serve

Warehouses

Restaurants  
and cafés

Residential  
compounds

Exhibitions

Offices and  
retail shops
